## C O M M I T T E D T O F A M I L Y ,

Thank you! Thank you for considering a Cimarron Trailer for your family. WE appreciate the opportunity to build a trailer for you and your family to make memories together. Cimarron employees understand the commitment you've made to your equine partners. The early morning feeding schedule, the after-work practice sessions, the all night drives to next event, the sire selection process for the next foal, the dreams, the drive, the determination, and the lifestyle. We understand it, we live it, we love it, and we're proud to help you and your family get there and back, SAFELY.

When you purchase a Cimarron Trailer, you become part of our family as well. You see, family is important to Cimarron. Cimarron Trailers is family owned and operated. Your trailer purchase allows our employees to achieve their goals & dreams for their family. We're not sending profits off to stock holders or "corporate suits." We are blue jean, boot wearing, people that love and care for this industry, our way of life, and the American dream.

Cimarron Trailers began in 2000 with the goal of building a better trailer, a better company, and better manufacturing culture. Since then, we've built over 10,000 trailers that are Better-by-Design through continuous product evaluation, innovation, and customer feedback. When we design, we choose the better part, not the cheaper part. When we manufacture, we choose the best equipment, not the lowest priced. When you look for your next trailer, all we ask, is that you evaluate your trailer choices and choose VALUE over price.

Sincerely,  
Cimarron Trailers Employees

## Tack Rooms to Fit **Your Needs**

Whether you have a lot or just a little, we have a tack room option just for you.

Cimarron design pros have a large variety of tack rooms to fit your specialized needs. Whether you have a lot or just a little, we have a tack room option just for you. Let us engineer an efficient, organized and user-friendly tack room to fit your needs.

# INTEGRATED POD & CONCEALED HAY LIFT

A safe platform for loading and unloading.

**Safe. Efficient. User Friendly.**

Cimarron has designed the safest, most efficient and user friendly Integrated Pod on the market.

*Lifting Hay with Ease*

## Ultimate Storage

Cimarron's Integrated Pod with Concealed Hay Lift are the ultimate upgrade options to add to a custom ordered Cimarron. The storage, convenience, and safety are unmatched in the industry. With storage room for hay, shavings, feed, or other necessities, Cimarron's Integrated Hay Pod maximizes useable room with a stylish aerodynamic design. The High-Rise lid with the "V" entry, along with 26" safety walls provide a safe platform for loading and unloading. Cimarron's exclusive Concealed Hay Lift makes loading hay a one person job, and your friend's jealous! The hay lift conveniently stores behind the full height door, folds down, then use the remote to send bales to the top of the trailer. Take the work and hassle out of loading your trailer, with a Concealed Hay Lift.

*Smooth clean appearance*

*Loaded Pod*

# AIR RIDE

Don't just drive. Float on the roads.

Air Ride axle

## Reduce Stress on Horses During Transport

The difference of Air Ride axles can be felt in the driver seat of the tow vehicle and seen in the mirrors.

AirFlex axles manufactured by Dexter Axle are proven to reduce stress on horses during transport. Our customers with Air Ride trailers consistently tell us how rested & fresh their horses are after hauling in a Cimarron Trailer with Air Ride. Our studies show a 42% reduction in stress on a trailer equipped with Air Ride axles. The difference of Air Ride axles can be felt in the driver seat of the tow vehicle and seen in the mirrors. You will instantly notice how smooth the trailer pulls

and how it "floats" over the variations of road surfaces. The Dexter AirFlex axles are designed with Air Ride suspension on Torsion axles. A self-contained air supply unit is located at the front of the trailer. This unit contains the air pump, tank, dump valve, pressure gauge, on/off switch, and release valve. Air lines supply the air to the height control valve located between the axles, then air is supplied to each side of each axle.

# OPTIONS

Customize your Cimarron trailer.

# LIVESTOCK MODELS

## Lonestar

Cimarron's heavy duty Lonestar stock trailer is built to last. It can help you get any job done whether your hauling animals to shows or to market. The Lonestar can be customized to transport any type of livestock from cattle to giraffes and every animal in between. Regardless of what you're hauling or where you're going, you can count on the durability and smart design of a Lonestar to get you and your animals there safely. Lonestars are available in gooseneck and bumper pull models, with or without front tack rooms.

## Showstar

Cimarron's Showstar features the same unmatched quality and intelligent design, perfectly packaged for smaller animals. Cimarron's signature attention to detail makes the Showstar the premiere low profile product on the market. They are loaded with innovative standard features that make hauling smaller animals easier, like our versatile pen management system and standard rear ramp. Showstars are available in gooseneck and bumper pull models.

## Stierwalt

Cimarron Trailers has teamed up with club calf legend Kirk Stierwalt to design the perfect club calf trailer. The Stierwalt Pro Package has all the most useful trailer features for hauling club calves like storage for your grooming chute, side ramp and effortless traveling center gate. Plus if you're looking for the show stopping Stierwalt style, you can combine the Stierwalt Signature Series exterior options with your Stierwalt Pro Package trailer for a trailer that gets the job done while turning heads.
